# NIMHANS, NCBS receive Rs 100 Cr grant to accelerate research of mental health disorders

30 March 2023 | News

**This new grant will strengthen the existing practices, allow the database and repository to become open source, and reach its potential of maximum utilisation by scientists all over the world**

Rohini Nilekani Philanthropies has announced a grant of Rs 100 crore to the National Institute of Mental Health and Neurosciences (NIMHANS) and the National Centre for Biological Sciences (NCBS), in Bengaluru, to set up the ‘Centre for Brain and Mind’. An inaugural programme for the Centre's launch is being planned in the next few months.

The Centre will further cutting-edge research to understand the causes, correlates, and course of five major illnesses - schizophrenia, bipolar disorder, obsessive-compulsive disorder, dementia, and addiction, and explore potential interventions and treatments for them.

Under this MoU, Rohini Nilekani Philanthropies Foundation, founded by philanthropist Rohini Nilekani, will support the activities of the ‘Centre for Brain and Mind’ (CBM) for five years starting April 2023. Over five years, CBM will simultaneously pursue two tracks - long-term research and building capacity for both research and practice in the mental health field.

Since 2016, NIMHANS, along with NCBS and inStem, have been collaborating on a project (then supported by the Department of Biotechnology and Pratiksha Trust), to build a research platform for facilitating discovery of better solutions for mental illness. The research platform is now ready to drive discovery in this area and will be housed at the Centre for Brain and Mind, which will be co-located at NCBS and NIMHANS.

By developing a core group of clinician researchers and basic scientists skilled in critical technologies and novel methods, the Centre will also establish a pipeline of younger researchers to carry forward this long-term enquiry.
