Calibre Chemicals takes over product development, R&D activities of Tina Life Sciences

11 April 2023 | News

With this acquisition, Calibre has taken a step forward to further enhance its R&D capabilities, especially in the field of complex organic chemistry

Calibre Chemicals, a leading nutrition, pharmaceuticals, and personal care speciality chemicals company, has reached an agreement with the proprietors of Bengaluru-based Tina Life Sciences, to acquire Tina's laboratory and product development business with immediate effect.

With this acquisition, Calibre has taken a step forward to further enhance its R&D capabilities, especially in the field of complex organic chemistry. Calibre will enhance the pace of new product development and the breadth of its Custom Development and Manufacturing (CDMO) Service offerings.

Dr Pintoo Ganguly, an accomplished chemist having diverse experience in developing products and processes in the Indian chemical industry, would lead Caibre's R&D activities.

"We are excited to accredit broader and newer R&D capabilities and welcome Dr Ganguly and his team to Calibre family," said Deepak Chander, CEO, Calibre Chemicals. "Our collective expertise and knowledge of organic synthesis, electrochemistry, process development, and manufacturing excellence, will enable us in serving our valued customers better."

Calibre's R&D centre is based in Bengaluru and another laboratory-cum-pilot-plant at our manufacturing facility in Sarigam, Gujarat.
