Apollo to open three more genomics facilities in 2023

25 April 2023 | News

Continues to invest in genomics technology and research for better patient care

Apollo has announced the expansion of the Apollo Genomics Institute with the launch of the facility in Chennai. Doubling down on its investments in genomics, Apollo Genomic Institute was earlier launched in Mumbai and Delhi.

By the end of 2023, Apollo aims to open three more genomics facilities in Hyderabad, Bengaluru and Ahmedabad respectively. The Apollo Genomics Institute aims to transform medical practice by bringing genomic services within the reach of every clinician & patient.

The Apollo Genomic Institute in Chennai will host a range of genomic services including genetic evaluation, clinical diagnostics, obstetric genetics, cancer genomics, prenatal genetic screening capabilities and more, empowering patients with information to manage and prevent genetic disorders.

Dr Preetha Reddy, Executive Vice Chairperson of Apollo Hospitals Group, said “The expansion of the Genomics Institute is a critical step towards the prevention and management of non-communicable diseases (NCDs), which continues to be a significant public health challenge in India and around the world”.

Apollo Genomic Network is planning to launch a genomic variant database to collate and secure the genomic data generated in a secure manner. The Pan-Apollo Genomics Network is also actively involved in academics and research activities.
