

Medtech firm Murata Vios to double headcount in next five years in India

26 April 2023 | News | By Narayan Kulkarni

Specialising in medical-grade IoT sensors and remote monitoring services

Murata Vios, one of leading manufacturers of Remote Monitoring Devices, with operations in India and the US, has in place a strategic and a well-researched plan to enter the different market segments of the healthcare industry in India.

Speaking to BioSpectrum, **Amit Patel, Co-Founder and CEO, Murata Vios**, who was recently on his first visit to India after COVID-19 outbreak, said, "the company plans to cater to the specific needs of the healthcare industry in India and establish a trustworthy name in the medical device fraternity. For this, we will double our headcount in the next five years."

With a mission to reduce healthcare facilitation costs, deliver greater clinician productivity, increase operational efficiency, and improve patient outcomes, the company has reached out to 15 hospital partners spread across Tier 1 cities and few Tier II cities such as Bangalore, Mangalore, Hyderabad, Mysore, Pune, Delhi etc.

The company is also planning to expand its operations to the Middle East, Europe and Japan in the next 12-18 months. Murata Vios is working on formalities of introducing the range of devices/ technologies it has to fulfil the stringent regulatory requirements in the developed markets such as Japan and Europe. "I feel in the next 12-18 months our devices will be made

available in Japan, Europe and the Middle East.”

Murata Vios today specialises in medical-grade IoT sensors and remote monitoring services for clients such as hospitals, medical and surgical units, step-down units, specialty care units, long-term acute care hospitals, skilled nursing facilities, and ambulatory surgery centres.
