Core Diagnostics launches satellite lab to expand diagnostic services

22 May 2023 | News

Equipped with cutting-edge technology and staffed by a team of highly skilled professionals

Core Diagnostics, a high-end diagnostic solutions provider headquartered in Gurugram, has announced its new satellite lab launch in East Delhi, Hargobind Enclave. This strategic expansion aims to broaden the company's testing capacities, ensuring enhanced accessibility to high-quality diagnostic services for healthcare providers and patients.

The satellite lab is an integral part of Core Diagnostics' strategic expansion plan, aimed at extending its testing capabilities and meeting the growing demand for efficient and accurate diagnostic services. This expansion allows them to bring high-quality diagnostic solutions closer to healthcare providers and patients, empowering them with timely and precise information for informed medical decisions.

It is equipped with cutting-edge technology and staffed by a team of highly skilled professionals who share Core Diagnostics' passion for excellence in diagnostics. With advanced diagnostic equipment, automation systems, and quality control measures, the laboratory aims to maintain the highest standards of testing excellence.

This expansion will allow quicker and more convenient access to critical diagnostic tests, reducing turnaround time and enabling prompt treatment decisions.
