C-CAMP receives CSR support from Cytiva to foster early-stage innovations in India

30 May 2023 | News

Some of the areas in the ambit are agriculture, nutrition, animal husbandry, environmental sustainability, mental health and wellness

Bengaluru-based Centre for Cellular and Molecular Platforms (C-CAMP) has received Corporate Social Responsibility (CSR) funding from global biotech giant Cytiva to support early-stage startups in India.

The funds will go into identifying promising early-stage ventures and accelerate their commercialisation trajectory by providing incubation and technical support, mentorship, pilot scale development, regulatory approval guidance, as well as networking opportunity with investors and industry stakeholders. Some of the areas in the ambit are agriculture, nutrition, animal husbandry, environmental sustainability, mental health and wellness.

Welcoming the signing of the agreement, Dr Taslimarif Saiyed, Director-CEO, C-CAMP, said, “We thank Cytiva for their generous support towards our mandate of fostering innovation that focuses on societal needs. The innovation ecosystem in India, especially the deep science sector will benefit hugely from more such funding by key industry players.”

Rajan Sankaran, Commercial General Manager, India, Cytiva said, “At Cytiva, we take great pride in developing our local biotech ecosystem and making a powerful impact on People and Planet, as part of our sustainability efforts. We thank C-CAMP for giving us this amazing opportunity to be a part of their journey to fuel an expansive and vibrant startup ecosystem that supports India’s AtmaNirbhar Bharat Abhiyan vision.”
