Pristyn Care launches AI-powered medical trainer 'Mira.AI'

06 June 2023 | News

Leveraging AI in healthcare training is poised to revolutionise the industry, allowing for more efficient and personalised education

Gurugram-based startup Pristyn Care has announced the introduction of its new artificial intelligence (AI)-powered trainer Mira.AI. With Mira's arrival, Pristyn Care aims to revolutionise the training process for its care coordinators by incorporating highly engaging training modules.

Mira is an advanced AI-enabled trainer designed to empower Pristyn Care's care coordinators with comprehensive knowledge and expertise across 13 medical categories. Mira will start delivering highly standardised and engaging training experiences to Pristyn Care's latest batch of 100 care coordinators.

These coordinators will undergo an intensive training programme of 92 meticulously crafted modules. By leveraging Mira's capabilities, Pristyn Care is ensuring its care coordinators have the necessary skills to assist patients and effectively provide the highest quality care.

The introduction of Mira represents the next phase of Pristyn Care's commitment to integrating technology into healthcare. In its next phase, Mira will also extend her training capabilities to doctors, hospital partners and paramedical staff, facilitating their understanding and adoption of the latest medical techniques and technological advancements. With Mira's guidance, Pristyn Care's medical professionals will enhance their expertise and stay at the forefront of the rapidly evolving healthcare landscape.
