Institute of Heart Lungs Diseases & Research Centre set to open in Delhi

19 June 2023 | News

IHLD has been instrumental in touching more than 20,000 lives so far through more than 5,000 complex heart & lung operations and transplants

IHLD
INSTITUTE OF HEART LUNGS DISEASES RESEARCH CENTRE

The Institute of Heart Lungs Diseases & Research Centre (IHLD) will soon open in the country's national capital, New Delhi. One of the premier institutes in North India, IHLD will be among the few institutes in the country offering specialised

healthcare services for heart and lung diseases, including related complex surgeries ,therapies for end stage heart & lung diseases and transplants.

IIHLD has a robust cardio-pulmonary rehabilitation programme which is unique in having artificial intelligence (AI) based motion sensing and skeletal muscle strength assessment programme that helps target physiotherapy to the affected muscles only, thereby being more effective & customised to the patient's needs & debility.

The Institute which has partnered with the 300-bed PSRI Hospital in Saket, South Delhi comprises of a team of 50 highly dedicated, passionate and skilled cardio-thoracic surgeons, transplant physicians, intensivists, cardiologists, rehabilitation specialists, nurses, and experienced social workers who work tirelessly with quality care and compassion at the core.

The Institute will have dedicated operation theatres, hybrid Cath Lab, cardiac & transplant ICUs, OPDs and cardio-pulmonary rehabilitation programme.

IHLD is supported by the Hans Foundation, one of the largest charitable and welfare organisations that runs comprehensive programmes across healthcare, disability, livelihood and education across the country. The foundation has supported Rs 3000 crore worth of welfare programmes over the past four years.
