Anthem Biosciences partners with Veeva to accelerate availability of new medicines

22 June 2023 | News

To deliver real-time visibility to clients, increase operational efficiency, and achieve GxP compliance

US-headquartered Veeva Systems has announced that fast-growing contract development and manufacturing organisation (CDMO) Anthem Biosciences has selected Veeva Vault Quality Suite as the digital foundation to drive quality excellence across its research and manufacturing facilities.

With Vault Quality Suite, Bengaluru-based Anthem Biosciences will have connected systems that can simplify quality, content, and training management.

Anthem is adopting Veeva Vault QMS, Vault QualityDocs, and Vault Training for greater visibility and insights into operational efficiency across its biological- and chemistry-based products and services. Using applications on a single platform will enable easier collaboration with stakeholders while delivering transparency to Anthem's customers, auditors, and regulatory agencies.

The Veeva Vault Quality Suite includes Veeva Vault QualityDocs, Veeva Vault QMS, Veeva Vault Training, Veeva Vault Validation Management, Veeva Vault LIMS, and Veeva LearnGxP to automate and harmonize quality processes globally.
