Oncquest collaborates with Nashik Specialty Laboratory for stronger foothold in Maharashtra

10 July 2023 | News

To address the advanced testing needs of clinicians and hospitals in Northwest Maharashtra

Oncquest Laboratories, a leading super-specialised laboratory network in India, has teamed up with Nasik Specialty Laboratory to enhance its operations in Maharashtra.

The strategic collaboration aims to address the advanced testing needs of clinicians and hospitals in Northwest Maharashtra, solidifying Oncquest's position as a prominent player in the field of cancer diagnostics and specialised testing.

Nashik Specialty Laboratory will offer a comprehensive range of tests, including routine tests, specialised and super-specialised categories of tests, and highly advanced genome testing.

With this collaboration, Oncquest Laboratories aims to continue its mission of providing accurate and reliable diagnostics to healthcare providers and patients, ensuring timely and effective treatments.

Oncquest, promoted by the Burman family (Promoters of Dabur India), started as a Dabur Research Foundation research entity in 2001 and has been a forerunner in molecular diagnostics services across India and neighbouring countries.It conducts over 4,000 different tests - from the routine to the most complex, spanning over 200 technologies.
