Zeon Lifesciences unveils revolutionary liquid-filled capsules

13 July 2023 | News

Partnered with collaborative third-party manufacturing for innovative liquid filled capsules

Noida-based Zeon Lifesciences has announced the launch of yet another revolutionary product to its portfolio, i.e. liquid-filled capsules. This one-of-its-kind of capsules offer a cutting-edge and unique delivery system enclosing a host of advantages

including enhanced bioavailability and absorption rates. It also ensures precise and consistent dosages empowering individuals to have better control over the administration of Zeon's products.

Harnessing advanced, one-of-a-kind technologies, these capsules deliver optimal levels of active ingredients, leading to maximum efficacy and more immediate results.

Realising the soaring demand for more convenient and practical dosage forms, Zeon has partnered with Collaborative Third-Party Manufacturing for Innovative Liquid Filled Capsules.

Prior to this, Zeon redefined the probiotics manufacturing segment by utilising the cutting-edge Intellicaps technology to encapsulate live bacteria in a protective casing and bolster the efficacy of probiotics. The company also recently forayed into the pet care industry with the launch of its new line of pet health supplements.

In May this year, the company announced its global expansion, taking its footprint to more than 13 countries in the FY 2023-24. The move came after Zeon Lifesciences carved a distinctive niche in regions like SEA, MENA, and GEC, with its expansive range of Nutrition Wellness & Ayurvedic products.
