Enbio AG eyes Indian market with world's fastest autoclave sterilisers

02 August 2023 | News

Catering to the increasing demand for fast, efficient, and reliable sterilisation solutions

Enbio AG, a global giant in the autoclave sector, has set its sights on the Indian healthcare market with its best-in-class Swiss-designed sterilisers. With an established presence in 50 countries, Enbio is now introducing its innovative and highly advanced B Class Autoclaves to India, capable of sterilising microsurgical instruments within 7-9 minutes. Enbio India has

charted an ambitious plan to capture a substantial market share within the next two-three years. The company also plans to set up a logistic centre in India in the coming years.

"Enbio is already establishing its presence across all major metro cities in India, ensuring that its cutting-edge products are readily available to a wide range of healthcare facilities. We want to focus on the Indian market and would invest to expand our business operations here," said Karolina Matracka, Global Sales and Marketing Director of Enbio Group AG.

Autoclave technology has seen remarkable advancements in recent years, revolutionising sterilisation processes in various industries, particularly healthcare. As per the industry estimates, the Autoclaves Market size exceeded $2.2 billion in 2020 and is expected to witness more than 9.7% CAGR between 2021 and 2027.

The global steam autoclave market size is estimated to be worth $3.18 billion by 2028. The pandemic has given a big push to the way India dealt with infection control. Medical practitioners now place a greater emphasis on infection control practices in hospitals and clinics to ensure patient safety and prevent nosocomial infections.

The exploration and the need to deploy advanced sterilisation technologies to ensure a higher level of disinfection and protection against pathogens have gained new momentum with the rising demand.
