

## Marengo Asia Hospitals partners with Ministry of Health, Mongolia

08 September 2023 | News

**Marengo Asia Hospitals is first to sponsor the training of 200 medical professionals and upskilling doctors, nurses, and paramedic staff members in Mongolia**

Marengo Asia Hospitals has announced its multi-level international partnership with three hospitals in Mongolia. This is a milestone as Marengo Asia Hospitals will be the very first healthcare provider to collaborate with the Ministry of Health, Government of Mongolia, where the Memorandum of Understanding (MoU) has been signed with the Central Health Department, the Ministry of Health, the Central Military Hospital, and the First Affiliated Hospital, the three major healthcare institutes in Mongolia.

The ceremony was presided over by the Health Minister of Mongolia Chinzorig Sodnom; Member of Parliament Professor Chinburen Jigjidsuren, and Narantuya Bayarmagnai, Director, Central Health Department.

Propagating the concept of a 'clinical corridor', Marengo Asia Hospitals has led the partnership with the Ministry of Health, Government of Mongolia to train 200 medical professionals. This is a strategic development aimed at enhancing healthcare services and promoting international collaboration. This endeavor brings together India and Mongolia to utilise the resources and talent to address the growing healthcare demands of the modern world.

The key focus of the partnership will be on capacity building, and skills enhancement within the healthcare force. Training programmes, knowledge sharing, and professional development opportunities will be offered to medical professionals from Mongolia at Marengo Asia Hospitals. The doctors from Marengo Asia Hospitals will also visit Mongolia for OPDs and to operate on patients. The key specialties in the first phase to focus on will be Cardiac Sciences, Oncology, Neuroscience, Liver diseases, and Urology.

The next level planned is conducting surgical master classes in the biggest government hospitals in Mongolia. The practice of clinical corridors and telemedicine will also be developed further for patients from Mongolia to connect with doctors for

consultations.

The current geographical presence of the hospitals includes Delhi NCR, Faridabad and Gurugram, Gujarat, Ahmedabad and Bhuj, and Jodhpur, Rajasthan.
