VFL Sciences launches Penguin Classic Laboratory Freeze Dryer /Lyophilizer

08 December 2023 | News

Freeze dryer is the first product with plans to launch several instruments in the coming years

Chennai-based VFL Sciences Private Limited has announced the launch of Penguin Classic, Laboratory Freeze Dryer / Lyophilizer. VFL Sciences Freeze dryer has been designed with focus on customers to deliver a state-of-the-art instrument that fits comfortably on a lab bench.

Advanced 7” touch screen display allows user to programme all the parameters easily. The instrument comes with features such as Auto defrost, Auto restart after power restoration, flexibility to use flask, vials, petri dish etc

For the first time in India, a laboratory freezer dryer is being offered that can be customised to one's requirements. Reach out with your specific needs and the company will be able to custom make the accessories and system. This is possible because the entire systems is produced locally.

Vancheeswaran Sankaranarayanan, Managing Director of VFL Sciences states, “Currently India is importing over 90% of all laboratory instruments. With the Indian manufacturing sector growing and the government is supporting make in India, it is now the time to produce scientific instruments in India. Freeze dryer is our first product and we have plans to launch several instruments in the coming years. We are sure that the Indian scientific community will find the products interesting and will support companies that are producing products in India”
