Clirnet teams up with African Medical Associations to revolutionise healthcare education

26 April 2024 | News

Healthcare professionals across Africa to gain unprecedented access to the latest medical advancements, facilitated by Clirnet

Mumbai-based startup Clirnet, a pioneer in innovative medical education solutions, has announced a ground-breaking collaboration with multiple African Medical Associations.

With a network encompassing over 450,000 doctors in India, Clirnet believes this partnership heralds a new era in advancing healthcare education. The collaboration aims to equip African healthcare professionals (HCPs) with seamless access to cutting-edge tools for enhancing medical learning.

In the first phase, Clirnet has received an overwhelming welcome from the young medical community in Africa. Building upon this momentum, the next step involves forging partnerships with specialised associations of healthcare professionals as Clirnet progresses into its second phase through the Pan-African Medical Marathon.

This unique initiative, comprising 75 CME sessions from eminent clinical experts, is designed to address the evolving needs and challenges faced by healthcare practitioners in Africa, equipping them with the latest advancements, best practices, and insights to enhance patient care and professional growth.

The alliance with African Medical Associations underscores CLIRNET's dedication to democratising healthcare education and breaking down geographical barriers. Through this partnership, healthcare professionals across Africa will gain unprecedented access to the latest medical advancements, facilitated by Clirnet's artificial intelligence (AI)-driven platform, thereby fostering a robust global network of HCPs.
