HiMedia collaborates with Wadhwani Research Center for Bioengineering

03 May 2024 | News

To drive impactful advancements in biotherapeutics

HiMedia Laboratories has announced a groundbreaking collaboration with the Wadhwani Research Center for Bioengineering (WRCB) at the Indian Institute of Technology (IIT) Bombay, marking a significant milestone in its mission to enhance accessibility to biotherapeutics.

This partnership represents a fusion of expertise, innovation, and dedication, aimed at addressing critical healthcare needs and revolutionising the field of biotherapeutics.

The HiMedia Bio Innovation Lab, spearheaded by Dr Vishal Warke, Director- R&D (Cell Biology & Hydroponics) and his team, is at the forefront of applied research, focusing on pioneering solutions that will reshape healthcare accessibility.

Through this collaboration, both organisations will be leveraging cutting-edge technologies and multidisciplinary approaches to drive impactful advancements in biotherapeutics.

The HiMedia Bio Innovation Lab serves as a hub for collaborative research, bringing together experts from diverse fields to tackle complex healthcare challenges. One of the key focus areas of the HiMedia Bio Innovation Lab is the development of advanced biotherapeutics for a range of medical conditions. Through rigorous research and development efforts, the company working towards creating accessible and effective treatments that can improve patient outcomes and quality of life.
