Qila.io collaborates with Mascot Spincontrol to bring transparency in clinical research

10 May 2024 | News

Partnership will likely evolve further with blockchain tokenisation solutions in clinical research

Mumbai-based Blockchain-As-A-Service company Qila.io has partnered with global clinical research centre Mascot Spincontrol to bring about transparency in clinical research through blockchain. The aim of the collaboration is to ensure that clinical trial data is secure, transparent and tamper-proof so that integrity of research outcomes is maintained.

The partnership will enhance transparency in clinical research, fortify data security, and instil greater confidence among stakeholders. This will help result in positive regulatory outcomes and effective healthcare solutions.

As part of this collaboration, Mascot Spincontrol and Qila.io have several joint projects and initiatives planned in the coming months. These include implementing blockchain tokenisation solutions for clinical research data sharing, pilot programmes to demonstrate the effectiveness of blockchain technology in improving data integrity and transparency, and exploring opportunities for further integration of blockchain solutions in healthcare research. These initiatives are aimed at delivering tangible results and demonstrating the value of our collaboration to the industry.

Mumbai-based Mascot Spincontrolis a clinical research centre formed through a joint venture between Mascot Universal and Spincontrol France.

In the future, the companies envision this partnership to evolve and to encompass a broader range of initiatives. These new initiatives will include the development of new blockchain-based solutions, the expansion of market presence, and the continued advancement of industry standards for data integrity and transparency.
