Bengaluru INDIA NANO 2024 hosts startup pitching initiative- NanoSparX

03 July 2024 | News

Offering startups an ideal stage to showcase their business ideas

The 13th Bengaluru INDIA NANO (BIN) 2024has started a new programme called NanoSparX- a startup pitching initiative in this year's edition. The BIN 2024 aims to spotlight the most innovative startups operating in the Nanoscience and Nanotechnology domain. These startups will have the opportunity to pitch and present their pioneering concepts during the event. It is essential that these ideas underscore the pivotal role of Nanotechnology in their products, technologies, or services.

This platform offers startups an ideal stage to showcase their business ideas to a distinguished audience, including industry leaders, research experts, policymakers, venture capitalists, and startups from India and prominent countries. The event is set to host over 700 delegates representing organizations from around the world, making it an invaluable opportunity for startups to gain exposure and recognition.

With this initiative the BIN 2024 is offering the startups a unique opportunity to present/connect with the global community and connect with leading experts and mentors, top corporate, and investors. Besides, BIN will be hosting B2B Partnering Meetings.
