

Eppendorf India strengthens MoU with Rajalakshmi Engineering College for training biotech students

16 September 2024 | News

Training includes intensive sessions with balanced theoretical and hands-on modules

Eppendorf India and Rajalakshmi Engineering College, Chennai have signed the extension of the existing Memorandum of Understanding (MoU) in setting up a framework to enable mutually beneficial and collaborative engagements in trainings to improve scientific research and development in the field of Biotechnology.

Eppendorf is committed to skill development by offering tailor made training programmes for graduate students of Biotechnology. Eppendorf India training facility in Chennai includes state-of-the-art laboratories as well as conference and classroom facilities.

A team of experts at Eppendorf would conduct the trainings on various modules such as Liquid Handling, Centrifugation, Extraction & Quantification of Biomolecules and PCR technique.

Training includes intensive sessions with balanced theoretical and hands-on modules ensuring the participants gain proficiency, nuances and trouble-shooting skills.
