

Freudenberg strengthens commitment to India with new product launches at CPHI & PMEC 2024

29 November 2024 | News

Launches Single-Use Assemblies & ASTC UV-Shield Tubing for Indian customers

Freudenberg, a worldwide technology business based in Germany, attended CPhI & PMEC India 2024 on November 26-28. Freudenberg is a trusted supplier of biopharmaceutical devices, systems, high-performance sealing, and filtering solutions, services to pharmaceutical and healthcare industries in India.

The booth featured pioneering solutions from its firms, including Freudenberg Medical (FM), Freudenberg-NOK India (FNI), and Freudenberg Filtration Technologies.

Commenting on the participation, G Sivasailam, Managing Director, Freudenberg Performance Materials, and Director and CEO of Freudenberg Regional Corporate Center India said: "Freudenberg's longstanding commitment to innovation and collaboration drives our contributions to India's pharmaceutical and healthcare industries. Through our participation in CPhI & PMEC India, we aim to bring innovative products and technologies that meet the evolving needs of these vital sectors, delivering reliability, safety, and performance."

Freudenberg Medical recently announced the PharmaFocus® Premium ASTC UV-Shield Tubing, which is specifically intended for photosensitive pharmaceuticals and has a platinum-cured silicone interior and an opaque exterior to maintain the integrity and stability of light-sensitive fluids. The company also provides advanced single-use components such as y-connector manifolds, tubing assemblies, and bottle cap assemblies with numerous inlets and outlets designed for cGMP bioprocesses. The HelixFlex™ TPE Tubing is a high-performance solution for cell and gene therapies. It provides outstanding visibility, durability, and sterilization adaptability.

Further, Freudenberg-NOK India demonstrates its experience in sealing systems tailored to pharmaceutical applications. Among its major breakthroughs are the Radiamatic® HTS II Seals, which are hygienic PTFE radial shaft seals designed for process industries, as well as inflatable and profile seals that provide outstanding resilience to harsh circumstances, ensuring reliability in pharmaceutical environments. Additionally, its clamp seals and O-rings, which are ISO and DIN approved, are designed to reduce contamination hazards while maintaining optimal performance.

Also, Freudenberg Filtration Technologies has been a leading producer of innovative air filtration systems to the automotive, industrial, and pharmaceutical industries since 1998. Its current product line is intended to create safe and efficient pharmaceutical settings. Key offerings include innovative Fan Filter Units (FFUs) tailored to different capacities and automation requirements, Safe Change Housing/BIBO Units prioritising containment and safety during filter replacements, and high-temperature and ISO 16890 filters designed specifically for critical pharmaceutical processes.
