Mahajan Imaging and Labs launches AI-powered lab in Gurugram

29 November 2024 | News

With advanced systems designed for seamless, AI-driven analysis

Mahajan Imaging & Labs has announced its expansion into Gurugram with a new, fully-equipped lab and Home Collection services. This facility will bring enhanced multi-testing capabilities powered by artificial intelligence (AI) to the Gurugram region and beyond, ensuring greater accessibility and faster turnaround times for patients.

The new lab is capable of processing thousand tests and offers cutting-edge diagnostic services with advanced systems designed for seamless, AI-driven analysis. This expansion reaffirms Mahajan Imaging & Labs' commitment to providing high-quality healthcare, addressing community needs, and supporting healthcare providers across the region.

Mahajan Imaging & Labs' Siemens' AI-Enhanced Multi-Testing Diagnostic System delivers faster, highly accurate results from a single vial, analyzing up to 206 parameters. Ideal for low-volume samples, especially in paediatric and complex cases, it reduces wait times drastically.

Capable of performing complex diagnostics like preeclampsia screening with high precision, this system sets a new benchmark for patient comfort and rapid diagnostics in urgent care. The lab located on the ground floor of the Times Sqaure Building in downtown Sushant Lok , also boasts of highly qualified and trained phlebotomists who are able to cover all areas of Gurugram.

This patient-centric approach allows individuals to book sample collections from the comfort of their homes, ensuring a seamless, hassle-free experience while maintaining the highest standards of accuracy and hygiene. The lab provides all services under one roof and is also fully equipped to cater to individuals who wish to come to the lab and get tests done.
