Apollo Cradle & Childrenâ??s Hospital plans expansion with 7-8 new centres in next 5 years

10 June 2025 | News

Also focused on expanding and upgrading its existing units

Apollo Cradle & Children's Hospital, a leading provider of maternity and children care, has announced ambitious expansion plans, projecting the opening of 7-8 new centres across India within the next five years and the latest one being in Mumbai and Hyderabad.

The announcement follows a period of significant achievement in the past 23 years and growth for Apollo Cradle, most recent being recognition as India’s No.1 OBGYN Hospital for 3 consecutive years.

The brand also celebrated the successful launch of its cutting-edge facility in Electronic City, Bengaluru. This new centre is already upholding Apollo Cradle's legacy of excellence, providing comprehensive care to expectant mothers and children.

The brand's robust infrastructure currently comprises 19 state-of-the-art centres across India including major cities such as Hyderabad, Bengaluru, Delhi NCR, Chennai, and Amritsar, supported by a dedicated team of highly skilled doctors and healthcare professionals. These centres offer a comprehensive range of services, including maternity, neonatology, pediatrics, gynaecology, fertility, and fetal medicine.

Apollo Cradle is also focused on expanding and upgrading its existing units. These expansions will feature larger facilities and enhanced infrastructure, ensuring an even more superior patient experience and greater capacity to serve the growing demand for specialised care.

This expansion will be supported by a robust approach to funding, aimed at not only establishing new centers but also facilitating continuous technological upgrades and providing even more exceptional support services to patients.
