CARE Hospitals & Emoha Eldercare to build holistic care ecosystem for seniors in Hyderabad

21 August 2025 | News

Geriatric Care Facility will be launched on October 1, 2025, at CARE Hospitals, Hyderabad

CARE Hospitals and Emoha, India's leading senior care brand, have announced a landmark partnership to redefine elder care in Hyderabad. The alliance will create a holistic care ecosystem that supports seniors.

As part of the partnership, a state-of-the-art Geriatric Care Facility will be launched on October 1, 2025, at CARE Hospitals, Hyderabad. This will be the first-of-its-kind dedicated unit designed to provide specialised medical attention tailored to elders' complex and chronic health needs, from comprehensive geriatric assessment to advanced clinical interventions.

This partnership also ensures that elders leaving the hospital continue to receive expert medical support and compassionate care at home, reducing the risk of relapse, readmission, and emotional distress. Once discharged, Emoha's trained carers, nurses, and care team step in to provide continuous support, from administering medications and monitoring vitals to assisting with daily health needs, ensuring elders recover safely in the comfort of their homes.

Equally important is the emotional dimension of care. Through the Emoha App, elders will stay connected to a vibrant community of seniors from across the country, enjoying online shows, interactive sessions, and specially curated events that keep them engaged and joyful.

Emoha's community-first approach and local presence across neighbourhoods further ensure that elders never feel alone, but instead remain active, connected, and valued within their families and communities.
