Maharaja Agrasen Hospital partners with MedLern to launch digital learning platform

06 October 2025 | News

To integrate MedLern's advanced digital learning solutions with the hospital's existing healthcare infrastructure

Maharaja Agrasen Hospital, one of New Delhi's leading multi-specialty healthcare institutions, has announced a strategic partnership with MedLern to launch an innovative digital learning platform. This collaboration aims to enhance medical education and improve clinical outcomes through advanced digital health technologies and comprehensive training programs.

The partnership will integrate Bengaluru-based startup MedLern's advanced digital learning solutions with the hospital's existing healthcare infrastructure to provide multimodal training programs, skill enhancement programs, and evidence-based training modules. The system will enable real-time learning assessments, interactive case studies, and collaborative knowledge sharing protocols to elevate healthcare delivery standards.

Dr Deepak Singla, Medical Director at Maharaja Agrasen Hospital, commented, "This partnership represents our commitment to embracing digital transformation in Hospital Training. We have always had culture of continuous learning and training. MedLern's digital infrastructure and multi-lingual and multi-modal content will enable all our teams to learn more effectively and deliver more precise, efficient care to our patients."

Deepak Sharma, Co-Founder & CEO of MedLern, added, "We are excited to collaborate with Maharaja Agrasen Hospital, known for its excellence in patient care. This partnership will showcase how digital learning technologies can enhance traditional training models, engaging all stakeholders and aligning their training investments to strategic focus."
