CLIRNET introduces DentalNet to redefine continuing dental education globally

06 January 2026 | News

A first-of-its-kind digital learning ecosystem offering free, expert-led, practice-focused education for dentists worldwide

Mumbai-based CLIRNET, a fast growing live Continuing Medical Education (CME) platform, has announced the launch of DentalNet, a next-generation digital platform designed to transform continuing dental education (CDE) for dentists across India and globally.

DentalNet provides free access to live expert-led sessions, curated clinical education, professional development programs, AI-powered clinical tools, searchable learning resources, and real-time moderated Q&A enabling dentists to upskill through structured, accessible, and practice-oriented learning.

DentalNet is designed to close the gap between academic learning and real-world dental practice by connecting dentists with leading clinicians and educators from India and across the globe. The platform emphasises practical clinical insights, latest guidelines, emerging research, and hands-on expertise, delivered through interactive live sessions and on-demand content formats.

With a strong focus on relevance and usability, DentalNet empowers dentists to stay updated, confident, and clinically prepared in an evolving healthcare environment.

Since its early pilot rollout, DentalNet has witnessed strong engagement from the dental community:

- 100+ live sessions available at launch
- 5,000+ curated educational content pieces
- 45,000+ dentists already part of the DentalNet community
- Weekly expert-led sessions planned to ensure continuous learning

DentalNet is supported by a distinguished faculty representing decades of clinical excellence and regional diversity. This diverse group brings together academic rigor, clinical depth, and real-world experience, ensuring meaningful learning across

specialties and practice settings.
