Coforge inks strategic partnership with Innovaccer to accelerate AI transformation in healthcare

27 January 2026 | News

Coforge will also establish a Healthcare AI Centre of Excellence

Noida-based Coforge Limited has announced a strategic partnership with US-based Innovaccer across the healthcare ecosystem designed to improve care delivery and patient outcomes.

This partnership will combine Coforge's domain expertise in driving organisational transformation with Innovaccer’s AI infrastructure and data platform, driving measurable improvements in clinical, financial and administrative results for healthcare organisations.

The two firms launched G-Forge, a joint initiative designed to help healthcare organisations scale AI, integrate siloed data, and improve enterprise decision-making.

G-Forge brings together Innovaccer’s Gravity platform and Coforge’s expertise in large-scale implementation and organizational transformation to support healthcare providers, payers, life sciences organiSations, and healthcare technology companies as they modernize operations and adopt AI across the enterprise.

As the preferred platinum implementation partner for Innovaccer’s Gravity AI platform, Coforge will also establish a Healthcare AI Centre of Excellence. Together, Innovaccer and Coforge will develop industry-specific accelerators and solutions in the areas of member and provider experience, care management, and revenue cycle management tailored to the needs of healthcare organisations, while offering end-to-end implementation, integration, and managed services to support Gravity deployments.
