Indira IVF Hospital acquires stake in Abha Surgy Healthcare in Kolkata

15 April 2026 | News

To further strengthen fertility care delivery in Eastern India

Indira IVF Hospital has acquired a stake in Abha Surgy Healthcare, which manages and operates a fertility clinic specialising in assisted reproduction under the name 'Abha Surgy Centre' in India.

Abha Surgy Healthcare has built its foundation in reproductive healthcare on a commitment to patient-centric care and fertility treatment. The organisation's vision is to be an accessible and trusted partner, offering advanced reproductive healthcare and personalised support at every stage of a woman's life.

This association arrives at a pivotal moment as demographic shifts are redefining fertility care priorities across the state. According to the Sample Registration System Statistical Report 2023, as cited in a 2025 report, West Bengal's total fertility rate has declined to 1.3 in 2023 from 1.7 in 2013, placing it well below the replacement level of 2.1. The state now ranks among the lowest in the country on this measure, while also recording the lowest urban total fertility rate and the second-lowest rural total fertility rate nationally. Against this backdrop, the need for accessible, timely, and structured fertility care continues to grow.

Bringing together Abha Surgy Centre's regional legacy and clinical depth with Indira IVF's scale, technological capabilities, and wider network creates an opportunity to further strengthen fertility care delivery in Eastern India. The association is aimed at building on shared strengths, expanding reach, and enhancing the overall patient experience while maintaining consistency in clinical standards.

With this addition, Indira IVF continues to expand its national network while reinforcing its presence in key regions. The organisation remains focused on growth, with an emphasis on delivering consistent, evidence-based care that responds to the evolving needs of patients across the country.
