NATHEALTH announced expansion of Leadership Team for FY 2026???

27 April 2026 | News

Shankha Banerjee appointed as Treasurer, and Mandeep Singh Kumar has been appointed as Secretary

NATHEALTH, an apex body representing the Indian healthcare industry, today announced the expansion of its Leadership Team for FY 2026–27 following its Governing Council (GC) meeting. Shankha Banerjee, CEO, Dr Lal Path Labs, has been appointed as Treasurer, and Mandeep Singh Kumar, Managing Director & Vice President, Medtronic India, has been appointed as Secretary, joining the previously announced leadership team led by Dr Sangita Reddy, Joint Managing Director, Apollo Hospitals Group, as President.

Siddhartha Bhattacharya will continue as Secretary General of NATHEALTH, leading the Secretariat's efforts to build strategic partnerships, strengthen regional stakeholder engagement, and collaborate with policymakers to drive the next phase of healthcare development in India.

Treasurer, NATHEALTH, Shankha Banerjee, CEO, Dr. Lal Path Labs said, "Delivering better health outcomes in India will depend on strengthening early intervention, continuity of care, and data-driven decision-making across the healthcare system. As the burden of non-communicable diseases continues to rise, there is a clear need to shift from reactive treatment to proactive and preventive care. Diagnostics will play a critical enabling role in this transition by supporting early detection and guiding clinical decisions. I look forward to contributing to NATHEALTH's efforts to build a more integrated, efficient, and patient-centric healthcare ecosystem."

Secretary, NATHEALTH, Mandeep Singh Kumar, Managing Director & Vice President, Medtronic India said, "India's healthcare ecosystem is at a pivotal moment, shaped by growing demand, evolving patient expectations, and rapid innovation. Building a future-ready system will require sustained investment in strong infrastructure, improved clinical outcomes, and scalable efficiency. Progress at this scale can only be achieved through deep collaboration across government, industry, and care providers. Medical technology has a critical role to play in advancing precision, expanding access, and enabling better outcomes for patients. Through platforms such as NATHEALTH, I look forward to working with partners across the ecosystem to accelerate innovation and create lasting impact for healthcare in India."

With this strengthened leadership, NATHEALTH aims to play a pivotal role in shaping the next phase of India's healthcare transformation. As the country progresses towards the vision of Viksit Bharat 2047, the focus will remain on enabling innovation, strengthening health systems, and fostering public-private collaboration.
