Mirror Therapeutics strengthens government healthcare outreach through BESCOM women's health initiative

11 May 2026 | News

Positions Mirror Therapeutics as a trusted healthcare awareness partner for Karnataka government departments

Miror Therapeutics, in collaboration with the Soham Foundation and the Karnataka Department's BESCOM (Bengaluru Electricity Supply Company Limited), effectively organised a Women's Health Awareness Programme on Perimenopause, Menopause & Hormone Replacement Therapy (HRT) under the banner of the Government Outreach initiative. This event was held at Belaku Bhavana, which is the corporate office of BESCOM located at KR Circle, Bengaluru.

This activity involved the enthusiastic participation of women employees from BESCOM and emphasised the growing significance of healthcare awareness programmes for women regarding their mid-life hormones and wellness.

As part of the organization's growing involvement with the public sector, Miror Therapeutics is trying to establish partnerships with government bodies in order to bridge the gap in awareness concerning healthcare via effective educational programs led by experts in the field.

The BESCOM project exemplifies the emerging status of the organization as an authority on healthcare knowledge as regards the development of wellness programs for employees.

The project supports the overall aim of Miror Therapeutics in increasing awareness regarding the hormonal health of women through effective partnerships with government institutions, healthcare professionals, and community organisations. This has enabled the organisation to build its reputation as an ideal health awareness and wellness partner for government organisations in the State of Karnataka.
