American medtech firm Zimmer Biomet opens GCC in Bengaluru

11 May 2026 | News

Accelerating the development of AI-driven surgical platforms

US-based Zimmer Biomet has opened its Global Capability Centre (GCC) in Bengaluru. This GCC will serve as a high-velocity hub for digital transformation, integrating the company's nearly century-long heritage in musculoskeletal health with India's digital engineering ecosystem.

By embedding its digital future within India's premier talent ecosystem, the company is future-proofing its operations, ensuring it possesses the agility and technological prowess required to lead the next era of personalised, robotic-assisted healthcare.

The GCC will focus on developing the next generation of patient-monitoring software; streamlining procurement and supply chain for the APAC market; and accelerating the development of AI-driven surgical platforms.

The firm is aggressively pushing the boundaries of AI and robotics, highlighted by the regulatory clearance of ROSA® Knee with Optimize™, the most advanced upgrade to its flagship robotic system, and its comprehensive digital care platform, ZBEdge.
