Galderma introduces new AM/PM antioxidant serum duo for skin health in India

09 July 2026 | News

New regimen introduces a science-backed antioxidant approach centered around Gallic Acid

Cetaphil, the globally trusted skincare brand from Swiss dermatology company Galderma, has expanded its Cetaphil skincare portfolio in India with the launch of the Cetaphil AM/PM Serum Duo with Gallic-AOX Power™technology. The new regimen

introduces a science-backed antioxidant approach centred on Gallic Acid, combining daytime defence with overnight skin barrier recovery.

As environmental stressors such as pollution and blue light become an unavoidable part of everyday life, the demand for effective antioxidant skincare has continued to grow. For consumers with sensitive skin, however, finding antioxidant solutions that deliver visible results while remaining gentle on the skin continues to be a challenge.

Addressing this need, Cetaphil's latest innovation combines Gallic Acid and Vitamin E in its proprietary Gallic-AOX Power™ Technology, scientifically proven to be 2x more effective than Vitamin C in antioxidant efficacy.

The Cetaphil Advanced Defense Serum (AM) helps defend stressed skin against oxidative stress caused by pollution, blue light and other environmental aggressors. Along with Niacinamide and Triple Hyaluronic Acid, it provides 100% antioxidant protection, helps make skin up to 7x stronger against daily stressors with continued use, and delivers a visible radiance boost in as little as three days. It also helps in improving of pores and fine lines.

The Cetaphil Advanced Recovery Serum (PM) supports the skin's natural overnight renewal process by helping repair the skin barrier while defending against free radical damage accumulated during the day. Formulated with Gallic-AOX Power™ Technology, Pro-Vitamin B5 (Panthenol), Centella Asiatica (CICA) and Bifida Ferment, it deeply hydrates and soothes stressed skin while supporting faster skin barrier recovery.

The Cetaphil AM/PM Serum Duo is now available across pharmacies, select modern trade and general trade outlets, as well as major e-commerce platforms across India.
