Merck appoints Sakshi Yadav as Head of Process Solutions India

22 July 2026 | News

With more than two decades of experience in the life sciences industry

Merck, a leading science and technology company, has announced the appointment of Sakshi Yadav as Head of Process Solutions, India. Effective August 1, 2026, Sakshi will lead the Process Solutions business in India, with a focus on accelerating strategic growth, strengthening customer partnerships, and reinforcing Merck's commitment to advancing the country's rapidly evolving biopharmaceutical manufacturing ecosystem.

“Sakshi joined Merck in 2019 and has held leadership positions in commercial, managing director’s office and business excellence. Sakshi brings a strong track record of driving sustainable growth, leading business transformation, and building high-performing, collaborative teams,” said Tony Budianto Bee, Head of Process Solutions, Asia Pacific excluding China, Life Science business of Merck.

As Head of Process Solutions for India, Sakshi will spearhead strategic initiatives, and drive operational excellence, further elevating our customer experience in the Indian market.

As she takes on her new role, Sakshi Yadav said, “India’s biopharmaceutical sector is at an inflection point, driven by innovation, rapid capacity expansion, and a focus on quality and sustainability. I look forward to leading Merck's Process Solutions business in India and working alongside our customers to accelerate innovation, strengthen manufacturing capabilities, and enable broader access to the next generation of life-saving therapies.”

With more than two decades of experience in the life sciences industry, Sakshi has consistently built high-performing teams while fostering a culture of innovation and customer centricity.
