RJ Corp Healthcare launches Cocoon Hospital in Chandigarh

24 July 2026 | News

To expand specialised maternal and child care

RJ Corp Healthcare has announced the launch of Cocoon Hospital, Chandigarh, a premium mother and child healthcare facility dedicated to delivering integrated, technology-enabled and compassionate care for women, mothers, newborns and children.

The launch comes at a significant time for Chandigarh's healthcare landscape, as the city continues to emerge as a major hub for advanced medical services through both public and private sector investments. Cocoon Hospitals complement this evolving ecosystem by bringing specialised maternal and child healthcare closer to families across the region.

Guided by its philosophy of "Creating Lifelong Bonds," Cocoon Hospitals has been envisioned as a comprehensive destination where every stage of parenthood—from pregnancy planning and antenatal care to high-risk pregnancies, childbirth, neonatal intensive care, paediatrics and women's wellness—is supported through evidence-based clinical expertise and compassionate care.

Sharing his thoughts on the expansion, Ravi Kant Jaipuria, Founder & Chairman, RJ Corp Healthcare, said: "Our expansion strategy is well underway, with upcoming advanced facilities in Lucknow and Guwahati, as we continue building a nationwide network of specialised maternal and child healthcare ecosystems."

Designed to meet the evolving needs of modern families, Cocoon Hospitals offer comprehensive services across obstetrics, gynaecology, fertility, foetal medicine, neonatal intensive care, paediatrics and women's health.

The launch of Cocoon Hospital, Chandigarh, further reinforces RJ Corp Healthcare's long-term vision of expanding specialised maternal and child healthcare across India. Alongside the upcoming pipeline projects in Lucknow and Guwahati, this network expansion is poised to set new benchmarks in pregnancy care, neonatal medicine and paediatric healthcare for families across Chandigarh, Punjab, Haryana, Himachal Pradesh and the wider North India region.
