Time Medical International Ventures announces partnership for installation of Inter-Op MRI Suite

03 August 2026 | News

To install the DRISâ??iMRI Medharanya system at Parul Sevashram Hospital, Vadodara

Time Medical International Ventures (India), a wholly owned subsidiary of Fischer Medical Ventures and a global leader in advanced medical imaging solutions, has entered into a partnership with Parul Sevashram Hospital, Vadodara, to install its revolutionary DRIS–iMRI Medharanya Suite, an AI-enabled next-generation portable intraoperative MRI system.

Time Medical has developed a revolutionary new variant of MRI imaging technology — DRIS–iMRI Medharanya, an AI-enabled, next-generation, portable and specialised MRI system integrating Augmented Reality (AR), Artificial Intelligence (AI), Machine Learning (ML), and Exoscope technologies.

The intraoperative MRI platform is designed to transform intraoperative imaging by providing surgeons with real-time visualisation during complex neurosurgical procedures, enabling unprecedented precision, safety, and surgical control in procedures that traditionally rely on limited visual feedback.

Time Medical International Ventures has entered into a partnership to install its first Modern Brain Suite: the DRIS–iMRI Medharanya system at Parul Sevashram Hospital, Vadodara.

Through this upcoming partnership, the DRIS–iMRI Medharanya Suite is expected to strengthen the university's academic and clinical ecosystem, giving medical students, residents, and faculty at Parul University hands-on exposure to next-generation neurosurgical imaging technology.
