Redcliffe Labs acquires Megavision Diagnostics for Rs 40 Cr

10 August 2026 | News

Expands radiology capabilities with two advanced MRI centers in Pune

Redcliffe Labs has announced the acquisition of Pune-based Megavision Diagnostics Center. The acquisition marks another strategic milestone in Redcliffe's journey towards building an integrated diagnostics platform, strengthening its integrated diagnostics capabilities by bringing advanced imaging and pathology together under one trusted ecosystem.

Megavision Diagnostics adds two MRI-equipped centers in Pune's Pimpri-Chinchwad, complementing Redcliffe's established pathology network and enabling patients to access a more comprehensive range of diagnostic services.

Having served the region for over two decades, Megavision has earned the trust of patients and clinicians alike through its commitment to clinical excellence and quality imaging services. This acquisition brings together Megavision's strong local legacy with Redcliffe's technology-led diagnostics network, creating a stronger foundation for expanding integrated diagnostic services across Western India.

Redcliffe will retain Megavision's entire workforce, ensuring continuity of patient care while further enhancing access to seamless, end-to-end diagnostic solutions.

Building on its established pathology presence, Redcliffe Labs is now expanding its integrated diagnostics capabilities to deliver more comprehensive diagnostic services. The acquisition of Megavision Diagnostics lays the foundation for a connected diagnostics ecosystem that brings advanced imaging and pathology together, while marking the beginning of the company's long-term strategy to strengthen its presence through strategic partnerships and acquisitions across Western India.

Over the past year, the company expanded its regional presence through the acquisitions of Prime Sonography & Diagnostic Center (Kota) and Sarvodaya Diagnostics (Ajmer), now operating under Redcliffe Medicentre Imaging & Labs.

Following the acquisition, *Dr Kedar Prabhakar Bhate* will continue to lead Megavision Redcliffe Labs, working closely with the Redcliffe Clinical Board to strengthen radiology services and drive the expansion of integrated diagnostics across Pune and the surrounding region.
