3. Continued to expand its patient reach and delivery of structured rehabilitation care.
4. Secured patent recognition for its proprietary methodology for prognosis, protocol creation, delivery and execution for neuromuscular and musculoskeletal disorders.

Founder Speaks -

Resolve360 is working towards integrating AI and AR technologies into rehabilitation delivery. With the growing demand for physiotherapy and rehabilitation, there is a significant gap between the need for care and the capacity for human-led delivery at scale. The company is exploring technology-led solutions to help bridge this gap and make rehabilitation more accessible and scalable.
