Inflexor Ventures leads Rs 65 Cr investment in Butterfly Learnings to transform paediatric neurodevelopmental care platform

19 August 2026 | News

Butterfly Learnings plans to deepen its presence across India

Butterfly Learnings (Bombay Autism Services), India's first full-stack paediatric behavioural health platform for neurodivergent children, has raised Rs 65 crore in its Pre-Series B funding round, led by Inflexor Ventures, with continued participation from existing investors Insitor Partners and Enzia Ventures, reaffirming their conviction in the company's long-term growth.

The fresh capital will be used to expand Butterfly's centre network across India, strengthen its technology platform, and commercialise its breakthrough early autism screening solution.

Nearly 45 million children across the country are estimated to live with conditions such as Autism Spectrum Disorder (ASD), ADHD and learning disabilities, yet only a small percentage receive timely intervention. Delayed diagnosis, fragmented care pathways and a shortage of trained specialists continue to prevent children from receiving support during the most critical years of brain development.

Mumbai-based startup Butterfly Learnings is the only BHCOE (Behavioural Health Center of Excellence) accredited therapist training institute in Asia, reflecting its commitment to globally recognised standards of behavioural healthcare delivery.

A key differentiator for Butterfly Learnings is Get SET Early, a patented eye-tracking autism screening technology for which the company holds an exclusive global licence. Following CDSCO approval, the solution enables autism screening in children as young as one year old, helping reduce diagnostic delays and enabling earlier intervention.

The newly raised capital will support Butterfly Learnings' expansion from being predominantly focused on Maharashtra to other geographies in India, strengthen its digital and AI capabilities, scale the deployment of Get SET Early through hospitals and pediatricians, and expand its in-house therapist training programme.

Looking ahead, Butterfly Learnings plans to deepen its presence across India, strengthen partnerships with hospitals and paediatricians, expand access to inclusive education, advance AI-enabled precision care, reinforcing its mission of making high-quality neurodevelopmental care accessible to families across India.
