Healthcare and Life Sciences leaders to convene in Hyderabad for RISE Health Innovation Summit 2026

02 September 2026 | News

Discussions throughout the day are expected to span leadership perspectives on the healthcare industry's future

Healthark's RISE Health Innovation Summit 2026 will hold its live event on September 24 at Trident, Hyderabad, beginning at 10:00 AM. This marks the culminating day of the summit, bringing together industry leaders for a day of direct engagement and dialogue.

The event brings together leaders from across the life sciences and healthcare (LSHC) industry for a day of dialogue on the sector's evolving global priorities. Discussions throughout the day are expected to span leadership perspectives on the healthcare industry's future, the changing role of Global Capability Centers (GCCs), and emerging developments in genomics and biotechnology, reflecting the breadth of conversations shaping the industry today.

Esteemed leaders across pharmaceutical, healthcare, and technology organisations are set to take the stage, including John Dawber, VP & MD, Global Business Services, Novo Nordisk; Vignesh Krishnakumar, Senior Manager - Analytics, GATE, Roche; and Mahesh Natrajan, Senior Director - R&D, Thermo Fisher Scientific, alongside other senior voices from the sector.

RISE Health Innovation Summit 2026 continues to bring the global LSHC ecosystem onto a single platform, creating space for cross-industry dialogue on the challenges and opportunities ahead. In doing so, the summit reinforces its standing as a leading global forum for healthcare innovation, research, and talent.

[Registration](#) for the live event is now open, with limited paid access available for delegates.
