Cyrix Healthcare acquires Blue Star E&E's MedTech solutions business

04 September 2026 | News

To further strengthen AURUM, Cyrix's refurbished medical equipment business

Kochi-based Cyrix Healthcare has completed the acquisition of the MedTech Solutions business of Delhi-based Blue Star Engineering & Electronics (Blue Star E&E), effective September 1, 2026. The acquisition strengthens Cyrix's capabilities in medical imaging, equipment sales, installation, maintenance, repairs, refurbishment and lifecycle management.

The acquisition brings together Blue Star E&E's established MedTech Solutions business, experienced professionals, customer relationships and deep expertise in multi-brand CT and MRI with Cyrix Healthcare's growing Total MedTech Management platform.

Blue Star E&E's refurbishment capabilities will further strengthen AURUM, Cyrix's refurbished medical equipment business, particularly in refurbished CT and MRI systems. The combined platform will also provide stronger access to refurbished equipment, spare parts and accessories, supported by Cyrix's warehouse and service network across India.

The combination of Blue Star E&E's specialist imaging expertise and Cyrix's broader MedTech capabilities creates a stronger platform to serve the evolving needs of healthcare providers and advances Cyrix's vision of building a comprehensive Total MedTech Management ecosystem across India, the Middle East and Africa.
