Amaha set to close Rs 100 Cr fundraise to strengthen mental healthcare capabilities

23 October 2026 | News

Capital will drive further expansion of Amaha's hospital and clinic network in key cities across India

Amaha, a Mumbai-based integrated mental healthcare organisation, is set to close Rs 100 crore fundraise to expand its hospital and clinic network and strengthen access to specialist care for people living with moderate to severe mental illness and their families.

The round includes participation from existing investors such as Lightbox Ventures and Fireside Ventures, alongside London-based life skills platform, Sandbox International Holdings Limited (SIHL), Nithin Kamath (through Rainmatter), and the family offices of Shreyas Shibulal, Ashish Bharat Ram and Mr. Adarsh Jalan. The Rs 100 crore round also includes Rs 10 crore in debt financing from Alteria Capital.

This capital will power the next phase of Amaha's growth, including new hospitals and clinics in key cities across India. It will also help Amaha strengthen its clinical teams and invest in the technology and structures needed to deliver high-quality specialist mental healthcare to more people across India.

As its network grows, Amaha will further invest in strengthening clinical training and supervision, expanding its range of evidence-based treatments and protocols that ensure consistent standards of care.

It will also invest in technology, including AI-enabled tools for triage and clinician support, and data analytics that help clinical teams coordinate treatment, track outcomes and improve care delivery. Together, these capabilities will support clinicians in providing personalised, evidence-based care across Amaha's digital, outpatient and hospital services.
