Cole-Parmer launches precision measuring instruments

The Digi-Sense brand offers new technologies that deliver accurate readings while withstanding rigorous use. From environmental testing meters to performance monitoring equipment, many of the items are precalibrated to save time, cost, and effort.

With products individually calibrated before shipment, the measurements provide an unrivaled level of confidence.

The Digi-Sense brand currently includes 25 models of thermometers, infrared devices, humidity meters, anemometers, light meters, and manometers.

Additional products that fill other measurement needs will soon be available according to the company's press release.

Digi-Sense also features a comprehensive line of temperature probes with customization available for unique applications.

The new suite of products is designed to meet the ongoing needs of technicians.

With more than 50 years of experience, Cole-Parmer is a global leader in supplying fluid handling, life science, and general laboratory products, instrumentation, and equipment to the Biotech, Chemical, Academics, Environmental, Food, Industrial Manufacturing, and Print industries.

Offering a wide selection of products and instrumentation, Cole-Parmer works with R&D, pilot plant and production, specializing in providing scale-up assistance.

With a mix of proprietary products and strategic partnering with leading manufacturers, Cole-Parmer's business is highly diversified across a spectrum of products, consumables, services and solutions.
