Arrayit offers 8-pin professional series microarray printhead

Arrayit which has been a microarray technology market leader for more than a decade, offers a new 8-pin professional series microarray printhead that is fully compatible with Bio-Rad Calligrapher BioOdyssey MiniArrayers.

Arrayit technology enables current calligrapher customers to upgrade their existing instruments for improved printing accuracy and precision, while utilizing the factory calibration settings and native system software for ultimate convenience.

Also, Arrayit printheads are "bolt in" replacements configurable in less than 5 minutes. It empowers the use of 162 professional, 946, and Stealth series Arrayit pins for 50-750 Âµm spot diameters and 0.25-1.25 Âµl loading volumes, as well as a complete line of solid pins.

Arrayit microarray printing technology is highly recommended for all Bio-Rad Calligrapher BioOdyssey MiniArrayer customers wishing to extend the functionality of their system.
