India Lab Expo 2013 begins this November

This expo will serve as a common base in India for manufacturers and distributors from all over the world, leveraging the opportunity to showcase their latest products and technology to buyers and users.

The exhibition will also offer wide door of opportunities to various participants to connect with global leaders, learn about cutting-edge technology, know vital researches and appreciate the changes the industry is going to witness in the future.

The event will focus on latest trends and technology in the area of laboratory and analytical instrumentation, chromatography & spectroscopy, biotechnology and life sciences, process control & reactors, medical and clinical diagnostics, clean room & sterilization, quality control & environment, educational labs, measurement & testing, liquid handling & filtration, laboratory consumables & allied products, laboratory furniture and construction.

Participants can also look forward to new business leads and deals, connecting with key decision makers in buying organizations, networking with professional peers, government officials and regulatory agencies.

This year, more than 50 foreign companies from an array of countries including Germany, USA, UK, Hungary, Switzerland, Italy, Canada, China, South Korea, Russia, Taiwan and Sweden are anticipated to directly participate in this expo.

In totality, the expo is expected to be inundated with 300+ exhibitors and more than 10,000 visitors representing diverse industries.
