CURA-Oxford Instruments collaborate to develop high-end MRI equipment

Oxford Instruments Healthcare, a division of Oxford Instruments that specializes in providing refurbished CT & MRI scanners, has partnered with South India-based CURA Healthcare to provide high-end refurbished imaging equipment to the Indian and Bangladesh markets.

With this new partnership, Oxford Instruments Healthcare will expand into one of the fastest growing industries in India helping to provide affordable high-end MRI equipment to the country. Mr Bala Subramaniam, CEO of CURA Healthcare and his team will work alongside Oxford Instruments Healthcare to address India's growing demand by providing high quality ISO certified medical equipment backed by excellent after sales service and trained clinical applications team to support customers in India.

CURA claims that this partnership is significant for India and Bangladesh customers as it is the first time a global medical device brand with high reputation is partnering with an Indian company to satisfy the unmet needs of customers in both the countries.

CURA is the manufacturer, supplier of specialty patented products like Dream ERA range of DR systems, mobile CR and other HF x-ray systems and is also into pre-owned equipment processing and marketing of high end imaging diagnostics systems including CT, MRI, Mammography and Bone Densitometer. The company's business verticals include manufacturing and supply of Digital X-ray solutions, Ultrasound/Color Doppler, Critical Care devices and supply of Pre-Owned CT, MRI, Mammography and BMD systems.
