Jubilant strengthens its animal nutrition business

Recently the company partnered with BioResource International, Inc. (BRI), a global biotechnology company specializing in the research, development and manufacture of high-performance, cost effective enzyme solutions for animal nutrition, for marketing and distribution of selected feed enzyme Xylamax and XylaQuickproducts in South Asia.

Jubilant will be present at Poultry India 2014 scheduled to take place in Hyderabad from November 26th-28th. Jubilant's Animal Nutrition business offers high quality Specialty Feed Supplements and Additives and Premixes to the integrators, feed millers and commercial farmers across the globe. It will be showcasing its product portfolio that will comprise of several of its existing and its recently launched products in three broad categories of: Essential Supplements, Performance Enhancers, and Feed Quality Enhancers.

Speaking on Jubilant's participation, Mr Pramod Yadav, CEO, Advance Intermediates and Nutritional Products, Jubilant Life Sciences said, "Jubilant is a significant player in the nutrition market and manufactures a wide range of Nutrition Ingredients for application across feed, food, pharmaceutical, agrochemical, technical and personal care. We being a science driven organisation have developed in-house capabilities that has led to several innovations and successful development of custom products. We focus on relationship based approach and have been regarded as a 'trusted partner of choice' by our customers. We are confident that at Poultry India we will be able to develop new business partnerships and cement the existing ones."
