DHR short term course on proteomics

The course promoted by the ministry of health and family welfare, is targeted at faculty from medical colleges who are interested in the applications of proteomics for medical and nutrition research.

With only five seat available, the course is being held at Jamia Osmania, Hyderabad. The selected candidates will be provided travelling allowance, food and accommodation on campus as per government of India norm. The last date of submission of applications is December 09, 2013.
