Crystal ball Gazing 2015: Rasi Seeds

crystalball-gazing-unknown We are hopeful that the road block for doing research including GM crop field trials will be removed by Kharif 2015. If it happens Industry will revive the activities. The industry is hoping that a favorable push will happen from the government. As such there is positive mood in the Industry.

Our company performed better than 2013 and we have grown. We are confident that we will have substantial growth in 2015 with emerging new products. However, there will not be any appreciable growth in the agri-biotech sector. In 2015, we look forward to achieve deep penetration in all markets with our new products in cotton, corn and rice.
