Eppendorf's revamped vacuum concentrator

The new lid is said to increase the scope of the instrument for several biological applications in various industries.

The Concentrator plus with advanced heating technology will provide treatment for samples assuring quick, efficient and gentle vacuum concentration of DNA/RNA, nucleotides, proteins and other liquid or wet samples.

With three different application modes to correspond to various solvent types - aqueous, alcoholic or high vapor pressure, processing time for sample evaporation will now reduce by 20% said Eppendorf's press release.

Eppendorf is a life science company that develops and sells instruments, consumables, and services for liquid, sample, and cell handling in laboratories.
