

## Pharmaceutical Growth & Profitability Summit

10 June 2004 | News

**June 2004**

### Pharmaceutical Growth & Profitability Summit

SR institute is organizing the Pharmaceutical Growth & Profitability Executive Summit on June 21-22 2004 in Park Hyatt at the Bellevue Hotel, Philadelphia. The summit provides cutting-edge economic, R&D and financial strategies via keynote presentations and panel discussions. The meeting will cover comprehensively the most timely topics for revitalizing revenues including medicare and regulatory policy concerns, pricing, reimbursement, generic competition, imports, R&D attrition rates and productivity strategies, innovative marketing approaches, M&A, patent expirations, etc.

### Outsourcing of Pharma Chemistry Drug Discovery & Manufacturing

This annual outsourcing event will be held on July 14-15 2004 in Wyndham Philadelphia at Franklin Plaza Hotel, Philadelphia. The 8th international Outsourcing of Pharmaceutical Chemistry, Drug Discovery & Manufacturing meeting is the information and networking conference and exposition that brings together from around the world the pharmaceutical, investor, and service provider communities to address the fast-growing, changing and globalizing system of services for the life sciences industry. The meeting will emphasize on early discovery outsourcing, as well, as process research and

development, intermediates, API and manufacturing.

## **Antibody World Summit 2004**

Strategic Research Institute is organizing the 3rd Annual Antibody World Summit at Crowne Plaza Philadelphia Hotel, Philadelphia, PA from July 19 to 21, 2004. The summit offers the opportunity to learn about the latest in antibody technologies, production, and therapeutics from the industrial, academic and financial communities. The conference consists of three tracks—antibody discovery & development; antibody deal making & financing and biopharma production & manufacturing.

## **Bioinformatics of Genome Regulation and Structure**

The Fourth International Conference on Bioinformatics of Genome Regulation and Structure (BGRS'2004), a biennial event, will be held from July 25-30 2004 in Akademgorodok, Novosibirsk, Russia. This is a multidisciplinary conference and scientists with an interest in bioinformatics, mathematical, theoretical, or computational biology will benefit from the meeting. The event includes development and application of advanced methods of computational and theoretical analysis to structure—function genome organization, proteomics and evolutionary and system biology.

## **Structural Approaches to Sequence Evolution**

The workshop on "Structural approaches to sequence evolution: Molecules, Networks, Populations" is being held from July 5-10 2004 at Dresden, Germany. It aims to bring together people from different scientific communities working in the three areas of theoretical and empirical studies of population dynamics, computational and experimental studies of the stability and properties of biological macromolecules and statistical analysis of sequences databases. The possible synergies between these experimental, theoretical, computational, and statistical analysis approaches are anticipated to improve the understanding of the processes and pathways of molecular evolution.

## **Bangalore Bio 2004**

Bangalore Bio2004, the fourth edition of Asia's premier biotech event will be held from 11-13 July 2004 in Palace Grounds at Bangalore. The event is being promoted by Govt. of Karnataka and Vision Group on Biotechnology. This annual international event is a networking opportunity for technologists, entrepreneurs and scientists to showcase their products and services. It expects 150 exhibition participants, 500 delegates, 30 countries, 9 Indian states, 20,000 trade visitors and 30,000 general visitors, at the 3-day tradeshow, conference, B2B forum and knowledge pavilion.
