Sun Pharma recalls allergy drug in the US

As per the information available on the US Food and Drug Administration's (US FDA) website, Ohm Laboratories, a unit of Ranbaxy Laboratories, is recalling 10,85,095 boxes for being "Superpotent Drug: Out Of Specification."

Sun Pharma had acquired Ranbaxy in a \$4-billion deal last year.

The recall was initiated on July 28 this year and has been put under Class-III which the US FDA defines as "a situation in which use of or exposure to a violative product is not likely to cause adverse health consequences."
